Research in Progress

"Teaching Industry Reviews and using them in Student-Managed Investment Funds." (2025)
Accepted for publication in the Journal of Financial Education pending minor revisions.

"Recommending students do their homework is good advice: how educational effort influences income and wealth" with Ken Shimizu and Jay Zagorsky (2025). Empirical study exploring the influence of homework completion on future income and home ownership. *Submitted for publication.*

"Career Value of the CFA® Program: Designation or Education?", coauthor K. Vinas, draft presented at the 2012 Financial Education Association Annual Meeting, 2013 Eastern Finance Association Meeting and the 2013 Financial Management Association Meeting. This survey-based research seeks to determine what impacts career development—graduate level education or professional certifications. *Rewrite in process.*

"Equity Valuation Metrics and Valuation" (presented at 2011 R.I.S.E., 2009 EFA and 2008 FEA conferences). This research explores the factors that determine valuation levels for different market sectors.

"Using Asset and Accounts Data to Examine the Absence of Value-Added from Investment Decisions by Institutional Plan Sponsors", coauthor John Freeman, 2009 draft manuscript. Institutional investors appear to make decisions to terminate or simply reduce assets of their portfolio managers depending on the size and persistence of underperformance. This study explores these relationships.

"Web-Based Support and Wireless PDA Communication" (presented at the 2006 DSI annual conference, the International Association for Development of the Information Society annual conference and the Boston University Instructional Innovation Conference). The global investment industry requires lightning-fast response to information. This research study investigates the communicative capabilities enabled by web-based support and wireless PDA communication of financial analysis. We report on an experiment conducted utilizing a live student-managed investment fund mirroring industry. Both qualitative and quantitative data inform findings. 9 years of data have been collected through May, 2011 and initial analysis has been complete. A new experiment partnering with Pyxis Mobile and AT&T was conducted in 2009 and 2010. Additional data collected in 2011 and 2012.

INVESTMENT INDUSTRY EXPERIENCE

Fidelity Investments

1987 – 2001

Fund Manager and Equity Group Leader - Fidelity Management & Research Co.

Founder of Structured Investments Group - *\$45 Billion in Assets,
8 Portfolio Managers, 150+ Institutional Clients, 6 Mutual Funds
