## RESEARCH INTERESTS

---

I am an **interdisciplinary scholar** who studies **ethics, advice, and influence** with the aim to **improve outcomes and mitigate inequalities** in healthcare and society. I have a longstanding curiosity in conflicts of interest and the policies that attempt to manage them and more recent interests in professionalism, employee voice, burnout, and science communication. I use a multi-method approach of laboratory and field experiments, as well as archival and qualitative data, to explore my research questions.

- Ethics
- Employee Voice
- Trust and Influence
- Conflicts of Interest
- Informed Consent
- Principled Defiance
- Disclosure Policies
- Institutional Corruption
- Professionalism

## BOOK

---

1. **Sah, S.** (January 14, 2025). *DEFY: The Power of No in a World that Demands Yes*. One World, Penguin Random House.

In *DEFY*, I delve into the science of informed consent in medicine and apply the concept to a range of critical decisions in our lives. Creating a new moral vocabulary regarding consent, compliance, and defiance, my objective is to push readers to examine the connective tissue between micro personal elements and macro social movements to discover how everyday acts of consent or dissent add up to the society we live in. I draw from my own original research and that of others across multiple disciplines including organizational behavior, psychology, philosophy, ethics, sociology, law, behavioral economics, judgment and decision-making, and medicine.
